# THE CHOICE

*Fifteen-year-old Jared must kill an innocent old man to complete his gang initiation, but instead of shooting, he drops the gun. He may have saved the old man's life only to lose his own.*

When Jared refuses to kill for his gang, they beat him nearly to death. Comatose, his world splits in two. In one, Jared battles to wake from unconsciousness. In the other, he becomes a ruthless gang member known as J-Rock. After three years in darkness, Jared finally opens his eyes, and is bombarded by visions of the horrible crimes J-Rock is committing in a parallel world.

As Jared struggles to wake, he realizes his soul has been switching places with his criminal counterpart. With help from his rehab nurse, Kate, he discovers J-Rock is set on wreaking havoc in his world. Jared must find a way to eliminate J-Rock before the next switch, before J-Rock murders Kate and their expected child.

*“James Alexander has successfully brought a classic tale into a modern setting. The Choice is a story of doppelgangers and magic, but above many other stories with such things this book is not distracted by the fantasy and so it is not hollow. Alexander has come to tell us a human story, uplifting and tragic and eerie.” – Author of Terra Incognita*
